

TEADAL

**Trustworthy, Energy-Aware, Federated Data
Lakes Along the Computing Continuum**

www.teadal.eu

ABOUT TEADAL

TEADAL provides key cornerstone technologies to enable the creation of trustworthy, mediatorless federations of data lakes spanning the cloud-edge continuum and, as dynamic constellations of different organizations, to improve a trusted, verifiable, and energy-efficient data sharing.

**FOLLOW US,
STAY TUNED &
GET INVOLVED!**

OUR OBJECTIVES

Build efficient data lakes solutions with ease data handling across the computing continuum.

Construct trustworthy data lakes and mediatorless federation of data lakes.

Reduce the environmental impact of data analytics through energy-efficient federation of stretched data lakes.

Build privacy, organisational policies and GDPR compliant federation of stretched data lakes.

Contribute to and influence European research and initiatives with an aim to improve data sharing.
