TEADAL

Trustworthy, Energy-Aware, Federated Data Lakes Along the Computing Continuum
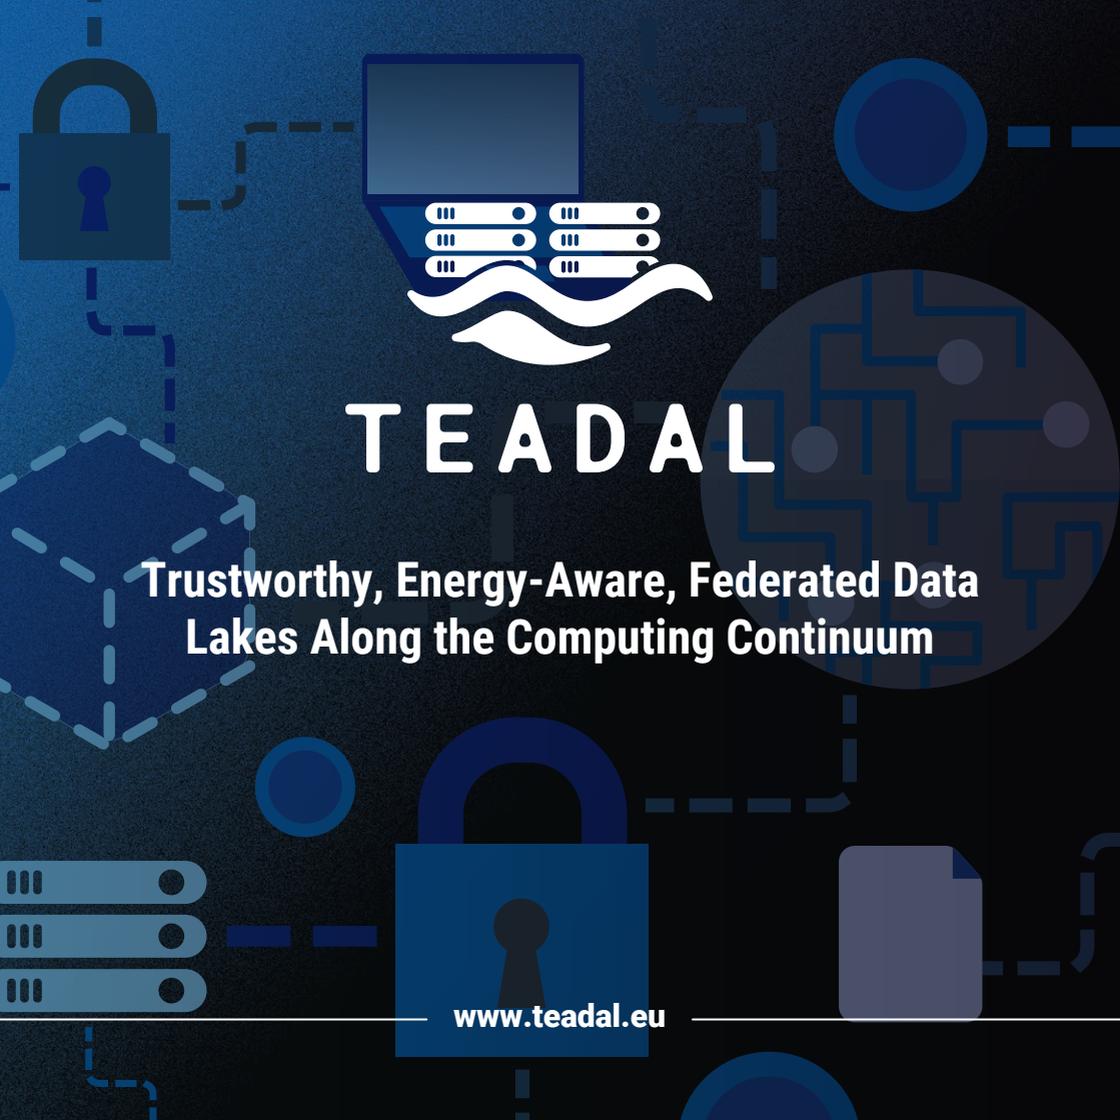

ABOUT TEADAL

TEADAL provides key cornerstone technologies to enable the creation of trustworthy, mediatorless federations of data lakes spanning the cloud-edge continuum and, as dynamic constellations of different organizations, to improve a trusted, verifiable, and energy-efficient data sharing.

OUR USE CASES

- Evidence-based medicine
- Mobility federated access point
- Smart viticulture data sharing
- Industry 4.0 fast KPI calculation
- Shared financial data governance
- Regional planning for environmental sustainability
